

Anlin Pet Doors

The new and improved Anlin Pet Door now features a clear dual flap system with Alnico magnets and dual high-density weatherstripping for the ultimate Anlin pet door. Made from a proprietary high density clear vinyl with UV inhibitors and flex additives, flap durability is guaranteed even in the harshest environments. The Alnico magnets ensure a "zipper-like" closing action, which pulls the flaps against the weather stripping for an optimum seal.

Key Features

- Flaps designed with proprietary vinyl blend for ultimate durability
- Dual Flaps with multiple magnets to ensure "zipper-like" closing action
- High density weatherstripping used to provide the best barrier against the elements
- Frame made from a high strength Aluminum to withstand even the toughest pets
